

THE LIVING ROOM, A REAL LIVING AREA

The living room is no longer what it was. It has now become a real living area, where things happen and merge with an astonishing facility. An open space, which is often bright with light, and where everyone likes to be at mealtimes, to spend time with friends, or quite simply to relax. The dining room, such as it was previously imagined, is now merged with the room where one lives. While often changing without realising it from lounge, dining area or TV corner. Over the years, the furniture has been adapted to this new lifestyle. The furniture has become more versatile, and more practical as well. New materials have allowed the creation of daring, very refined forms, and often ones of great lightness. The various collections presented in our stores enable harmonious assemblies, in which everyone likes to spend time, to be contemplated.

Living room department on the second floor

Lacquer, as you want it

Carré is pushing back the limits by proposing more than thirty different lacquers for wall suspension elements, available in wenge or American walnut finish. The compositions enable various sets to be assembled, and to have elements according to your inspiration. By exploiting the volumes and the dimensions. Reinforced shelf, TV unit, suspended drawer or cabinet module with flap door. Very robustly made..

hülsta®

A real library. Down to the last centimetre!

Books, we all have them. Some far more than others. But we all have the problem of finding room for them. Thanks to HULSTA and its **Mega-Design** programme, storage becomes a pleasure. This collection enables floor-to-ceiling wall elements to be constructed, down to the last centimetre. In five different finishes (white enamel, sand, beech, walnut and chocolate oak). Every cut in width and height is possible. Shelves with a depth of 21,9cm or 34,7cm, with a thickness of 2,5 cm, enough to support a few encyclopaedias!

This evening, we're having a party!

Difficult to imagine that a table of 100 x 200cm can be extended to the point of being able to accommodate, in two ticks, a large number of guests. The system is ingenious and enables additional places to be acquired as events require, the table then developing a length of 512cm. The SM24 table is available in maple, beech, oak, teak, chocolate oak, walnut and cherry finishes. In our illustration, the **SM24** table is shown with **SM64** chairs, available in leather or fabric.

Table **SM71**, dresser **SM753**, chair **SM59**.
Finish in oak, wenge, walnut, beech or cherry,
veneer or solid. Table of 109 x 190 (290cm
with extension leaves).

Astonishing Table **SM32** which opens like
a flower petal, considerably widening its
dimensions, dresser **SM753**, only in oak,
wenge, walnut, cherry and beech veneer.

dresser
(200 x 45 x 90cm)

Ethnicraft[®]
emotional[®] wooden furniture

Because wood is a
natural material that
continues to live

By definition, wood is a natural material that continues to live over time. That's what gives it its charm. ETHNICRAFT carefully selects the solid oak, walnut or teak from which the furniture will emerge. By taking care that, at the time of their assembly, the structures allow the wood to evolve with the time. ETHNICRAFT propose dining room, living room and bedroom furniture.

The VINCENT SHEPPARD furniture making resorts to an original technique, discovered by an American engineer at the beginning of the 20th century. This consists of rolling some kraft paper on a steel wire in order to obtain paper fibres, which are then braided into plaits. The result is like braided cane, except that it is both more solid and softer. It's this cane, so particular, that gives the Vincent Sheppard furniture its legendary comfort. The collection is available in raw or pearl colours.

VINCENT  **SHEPPARD**

Planet Table (90 or 120cm in diameter), chrome mounting, glossy white or black, **"Water"** chair, available in various colours (smoked grey, transparent, red, water green or orange).

The CALLIGARIS collection challenges our preconceptions somewhat by presenting models with unusual forms and colours. Tables, chairs and sideboards testify to a great simplicity in the development of the lines, to which is added the choice of materials in which, with a certain audacity, enamel, glass and polycarbonate intermingle.

calligaris 

"Convoy" Table (130 x 85cm), 50cm extension leaves, polycarbonate. **"Parisian"** chairs (6 colours), **"Password"** dresser (180 x 52 x 80cm).

The MARAIS INTERNATIONAL collection is intended to meet precise expectations. For this reason, it offers practical solutions, by presenting furniture that is auxiliary only in name, the utility of which is confirmed every day. Of rare elegance, this furniture happily espouses walnut, lacquer or glass. Each time, the marriage is a perfect success. Furniture that has its place, not only because it is useful, but also because it is quite simply beautiful. Very successful design, and meticulous manufacturing.
